

Air 1 is broadcasted in my home town of Boise, Idaho. This station provides on outreach to the community. It offers a positive message and alternative to any other station in our community. For many teens in the area this station is the only station that reaches out to provides something positive in their lives. I listen to this station all of the time, my kid listen to it as well. It is very encouraging to me to hear the words that come out of my childrens mouths they are not of sex, drugs, and violence but they are words of love, life and hope. There are so many so few stations to find this kind of wholesome and safe alternative, at least in our community. Our community would be served a great dis-service and lost if we were not able to continue to reap the benefits of Air 1. Thank you the opportunity to share my thoughts.
